

Non-surgical Treatments from Vein Specialists in San Antonio and Kerville

Varicose veins, spider veins and **hemorrhoids** are common vein-related diseases that require timely medical attention. Both surgical and non-surgical treatment options are available for these problems. If you are looking for a vein specialist in San Antonio and Kerville areas, it may be a good idea to choose an experienced professional who offers conservative, non-surgical solutions. These alternative treatments may cost only a small fraction of what you may well spend on intervention at the hospital. The best part is that the non-surgical remedies are usually covered by most insurance plans and Medicare.

Non-surgical treatments can effectively get rid of ugly and painful varicose veins, spider veins and **haemorrhoids**. Apart from the cost advantage, these treatments involve minimum pain and discomfort for the patient. Furthermore, the recovery is much faster and the patient can go back to work soon. Timely intervention from a vein specialist in San Antonio and Kerville areas can help to maintain normal circulation and prevent the condition from worsening in to a serious debilitating disease.

One of the Most Secure and Cost-Effective Alternatives to Surgery is Endovenous Ablation

This procedure involves delivery of laser soluble fiber or foam based medication directly into the particular diseased veins by having a slender needle. The medication helps to contract the vein and close the blood flow, that is transferred to a surrounding healthy vein. The closed vein ultimately goes away and gets absorbed by the body. This procedure helps to increase the blood flow to the heart, and also gets rid of the unsightly varicose veins with little soreness and almost no downtime.

With Laser Hair Removal, Most of the Treated Varicose Veins Will Not Re-Appear

However, in chronic conditions new varicose veins may appear, but they are likely to be much less extreme after the first treatment. Minor follow-up treatments can help the patient to keep the issue under check in the long run. Another important non-surgical treatment that an experienced vein specialist in San Antonio and also Kerville may offer is Sclerotherapy. This procedure is ideally applicable to spider veins, and involves the use of very fine needles that are injected directly into the veins. A sclerosing option would be administered to the diseased blood vessels that gradually dries up the veins and makes them vanish. This procedure is repeated three to five times for best results, and enhancement is visible within three to six months.

“  *Some Simple Home remedies for Hemorrhoids* There are topical creams and ointments with regard to treating hemorrhoids available in the market. There are even surgical procedures that remove the inflamed hemorrhoid. But before you spend money on any of these, you might want to try some home...

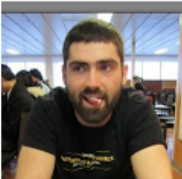

- Duplex ultrasound is yet another non-surgical method used for accurate supply of strong treatment directly into the deeper spider veins.
- The ultrasound helps to spot the underlying diseased veins that are causing spider veins on the upper layer of the skin.
- The medications or sclerosing solutions that are used in such treatments should be FDA-approved and have a proven effectiveness.

HemorrhoidsHaemorrhoidsHemorrhoid

An experienced vein specialist in San Antonio and Kerville areas may also offer non-surgical treatment regarding **hemorrhoids**. One of the latest procedures, which is minimally invasive and painless, is known as Hemorrhoidlysis. In this procedure a device is used to pass micro-current to the bottom of the hemorrhoid. This leads to a chemical reaction that helps in order to dissolve the diseased veins gently. The hemorrhoids gradually have a tendency to wilt and eventually recede. The treatment is combined with topical and oral medications for more effective results.
